

# The data

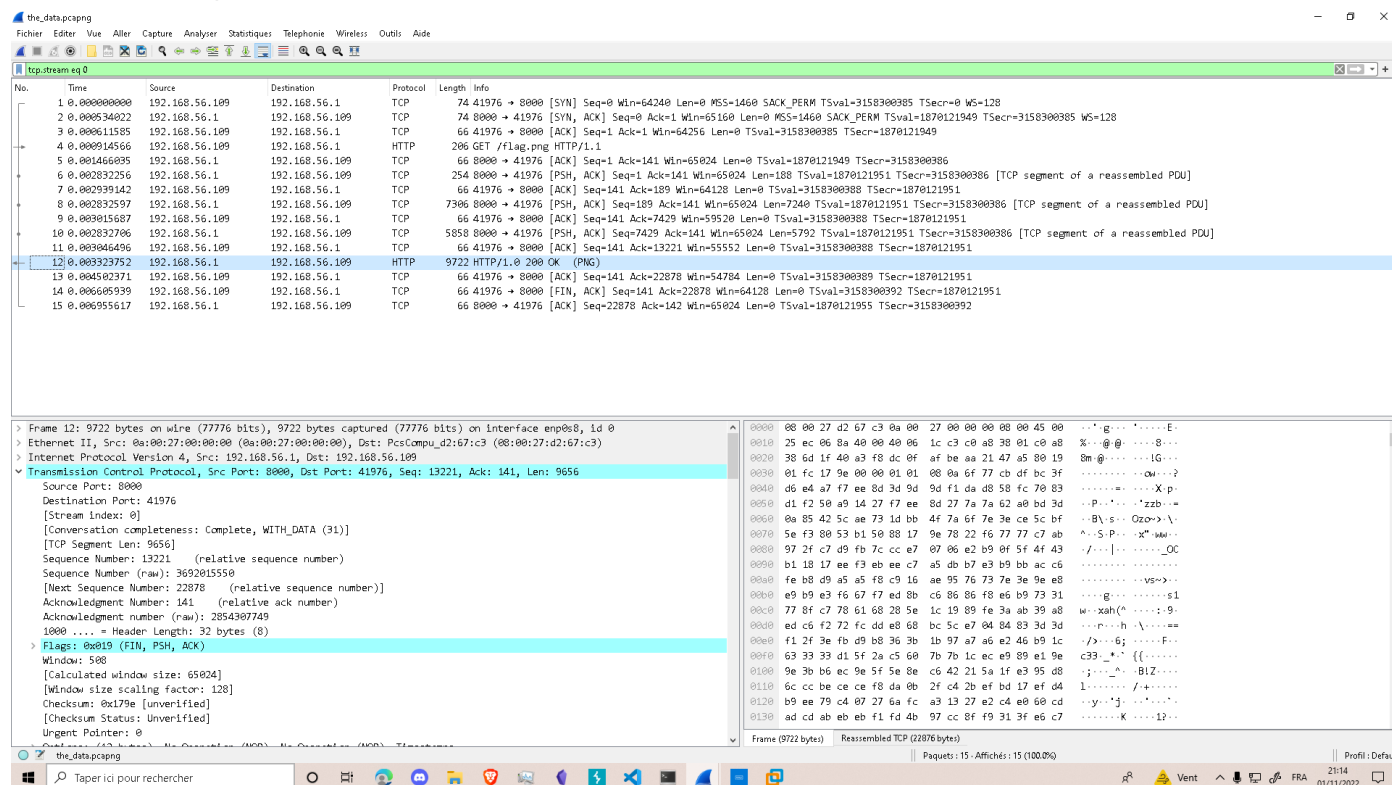

**Description:** There is pcapng file. Can you, again, reveal the flag ?

**Level:** Level 1

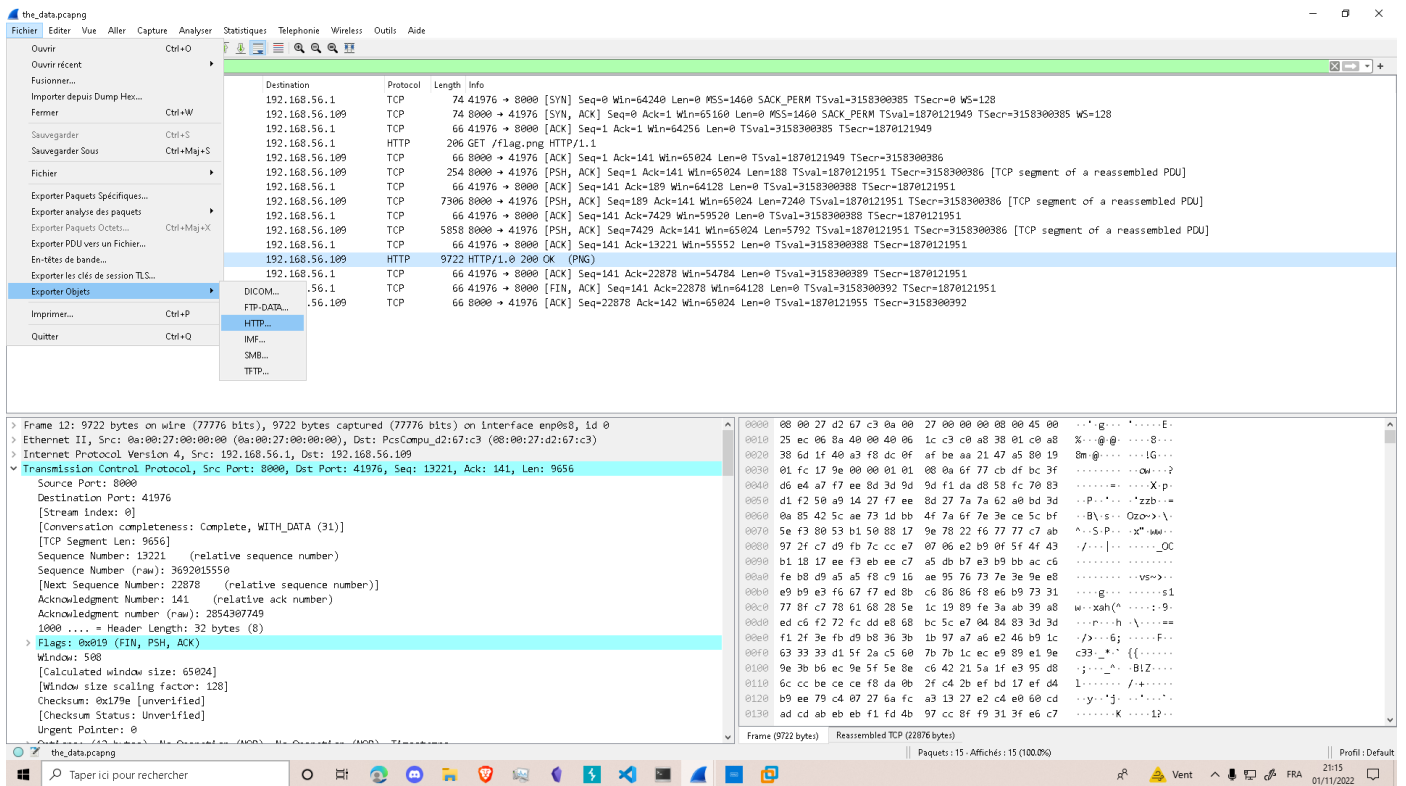

**Type:** Network

**Link:** <https://ctf.securityvalley.org/dashboard>

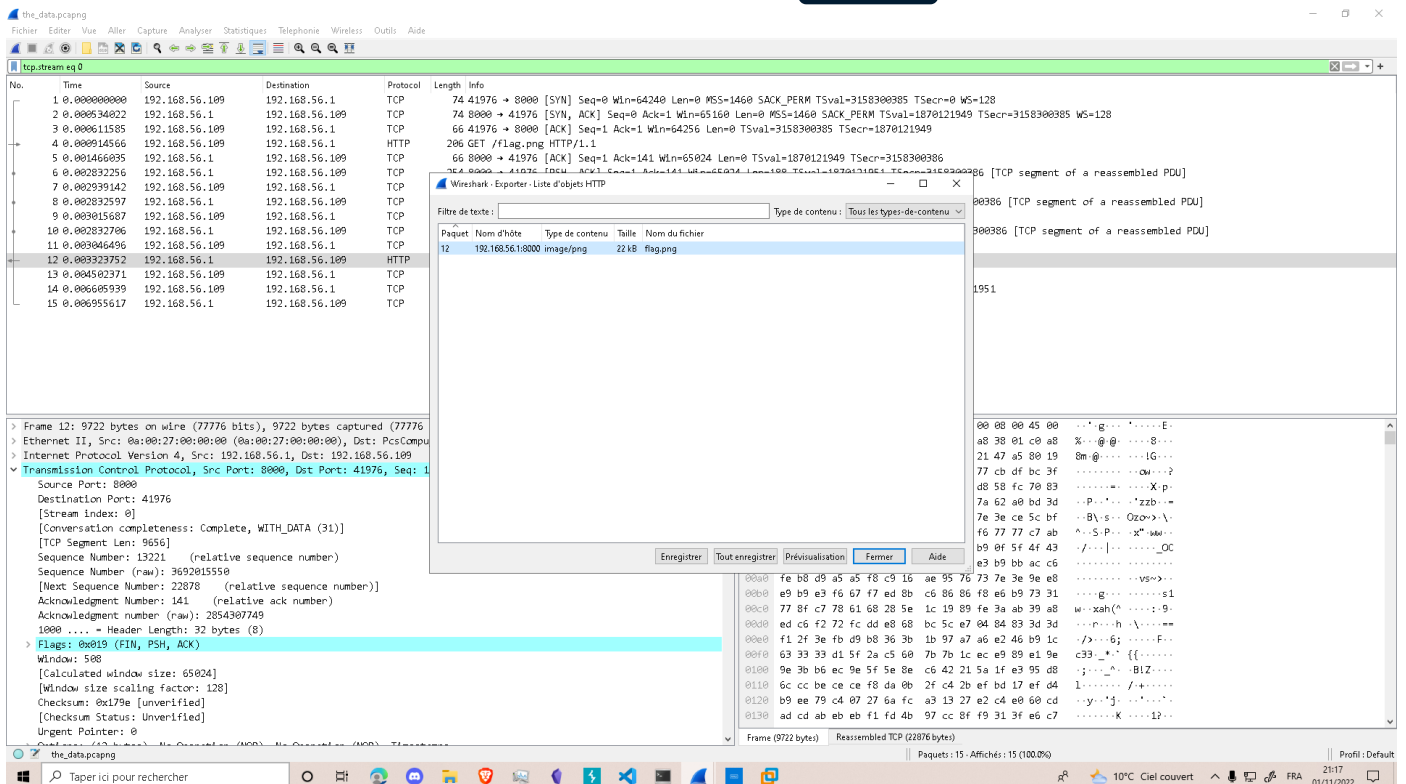

So, what we got is a `.pcap` file that we can open with **Wireshark**, and this is what we have:

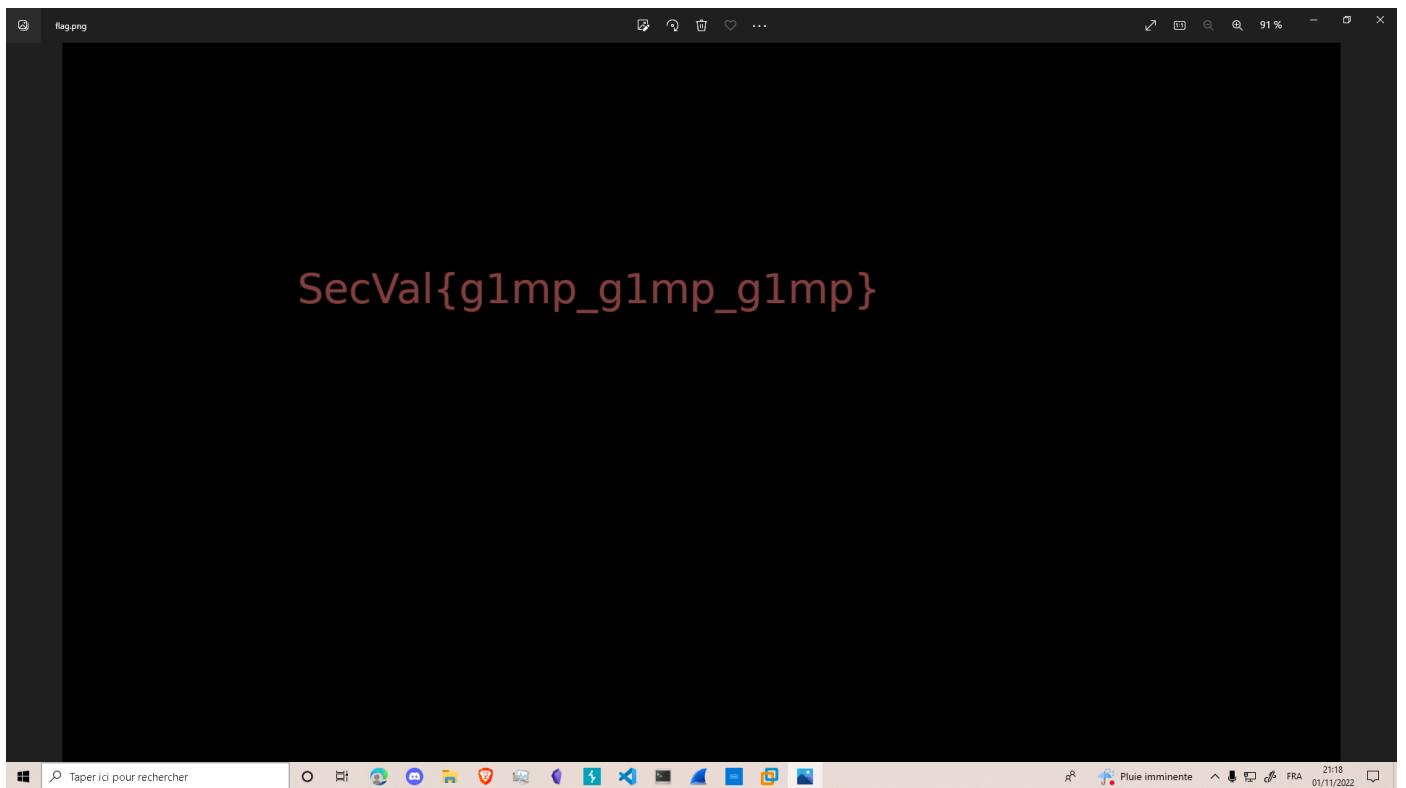

We can already see that we have a `.png` file, but we can't "open it" in this menu, so let's go ahead to: `file > export object > Http`:

And we can see that we have a file: **flag.png**:

And when we click on it and **prévisualisation**, the flag appear:

The flag is: **SecVal{g1mp\_g1mp\_g1mp}** !
